

SOLENO

Mastering Storm Water

GREEN INFRASTRUCTURE

OUR GREEN SOLUTIONS WITH
BIORETENTION AND BIOFILTRATION

Solenio, the leading developer of sustainable solutions for stormwater management innovates and adds green infrastructure to its offerings: **the most ecological solution for efficient and resilient stormwater management.**

Solenio provides 5 examples of development for the implementation of green infrastructure. These turnkey product packages, including **bioretention and biofiltration** systems, allow for the protection of water sources and natural environments with a sustainable management of the territory and its resources.

OUR EXAMPLES OF DEVELOPMENT

-  Commercial parking
-  Multifunctional paths
-  Vegetated median
-  Commercial street
-  Roundabout
